

Dear Sir or Madame

As a licensed amateur radio operator, I am writing to oppose the legalization and institution of "BPL-NOI", i.e. "broadband over power lines". We fear that this will create interference that will impede amateur radio and short wave listening. In addition to ruining a hobby that has contributed much to communications technology, it will impede emergency communications. As you know, BPL elsewhere has been a real detriment to RF communications.

Respectfully submitted

Stephen Jay Victor, M.D. WA2DTW
